

MDB is an Architectural Millwork specializing in all aspects of Lumber Processing. Use our experience and facilities to reduce your labor overhead and waste-removal costs, and start raising your bottomline now!

LUMBER MILLING SERVICES

- We can use your materials, drop-shipped right to our loading dock
- Allow us to handle high-volume rough-planing for further machining at your facility, letting us deal with waste removal and the associated labor costs
- You save money by having your labor force focused on your own specialty
- Allow you to take on jobs that you normally turn away due to lack of time or capability
- Re-Labeling and Contract Manufacturing available at our facilities

- High Tolerance Surfacing, 1 to 4 sides, using Knives or Abrasives for your specific surface quality requirements
- Straight-Line-Ripping and Re-Sawing to maximize stock yield and maintain consistency
- Precision Cut-To-Length with our CNC Feed Fence
- Profile Milling with stock profiles, or reproduction of your existing or custom profiles
- Pre-Assembly Wood Components and high-volume repetitive parts, such as Cabinet Door Stock
- Multi-axis CNC machining, utilizing MasterCam X5

Call us to find out how we can reduce your headaches and raise your profits!
